One ivory figurine in the shape of a polar bear. The bear is pictured on all fours with its snout near the ground. The face is heavily pitted. Possibly prehistoric Thule. The style of the ivory polar bear suggest it may be Thule, a culture that migrated throughout Alaska, Canada, and Greenland about 1000 years ago.

Description

One composite pipe (Description from catalogue) 1 Tobacco Pipe. Small metal bowl with wide flange, is relatively long tube with lugs and lashed to stem with finely cut babiche (Leather thong). Tamper is a metal slip decorated on one end. It is attached to stem bear boawl by thong on which a piece of caribou skin with hair and two (glass) beads have been strung. Stem is ca. 10 inches long, round and tapered. Made of two pieces of wood, grooved to make the hole meeting that of the bowl, The pieces are lashed together with thin babiche that also holds the bowll and covers about half the stem. Remainder held together with two single lashings and and three steel rings.
